About us

Determined to promote circular economy, BlueCycle collects and transforms discarded fishing gear from Greece into new creations, bringing sustainable design into everyday life.

BlueCycle proposes a holistic approach to tackle the problem of marine plastic pollution, combining environmental action, scientific research, creativity and high-end technology.

Inspired by the sea environment, we reimagine and redesign the life cycle of plastic waste generated by the fishing and shipping industry, using digital fabrication and handmade techniques to achieve a unique outcome.

Every creation carries a story of its own...

Features

- ◇ **Made from discarded fishing gear (fishing nets, mooring ropes, fishing lines etc.)**
- ◇ **Digitally fabricated products, using specialized robotic large-scale 3D printing**
- ◇ **100% recyclable**
- ◇ **100% traceable material, collected from Greece**
- ◇ **Indoor & outdoor use**
- ◇ **On-demand production**
- ◇ **Customizable**
- ◇ **Bespoke designs**
- ◇ **Made in Greece**

Environmental Impact

Plastic waste-free oceans

Every creation contains at least 60% of marine plastic litter from the fishing and shipping industry.

Traceability

We track our material every step of the way! From the moment we collect it from the Greek seas, to the end product we deliver.

Recyclability

Planning a renovation? We collect our products and we create something new for your space with the same material, since everything is 100% recyclable in our facilities.

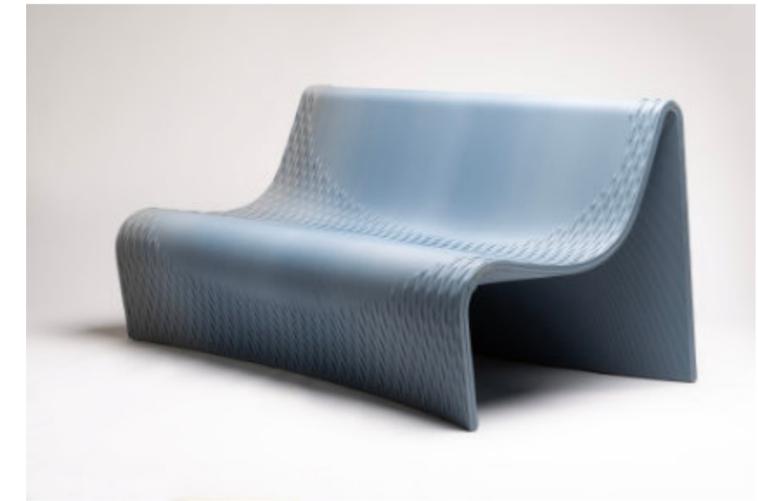

Greenhouse Gas Emissions

The Life Cycle Impact Assessment carried out to evaluate the environmental impact generated during our production process, showed that the greenhouse gas emissions are 50% less than the emissions for using 1kg of virgin plastic.

Outdoor & Poolside

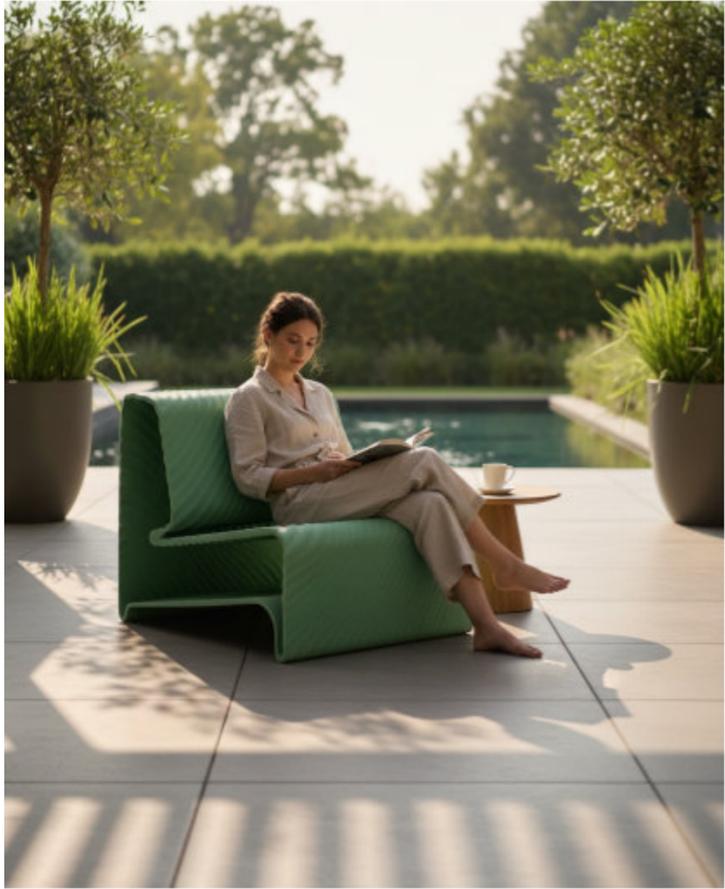

Private villa, Kefalonia island

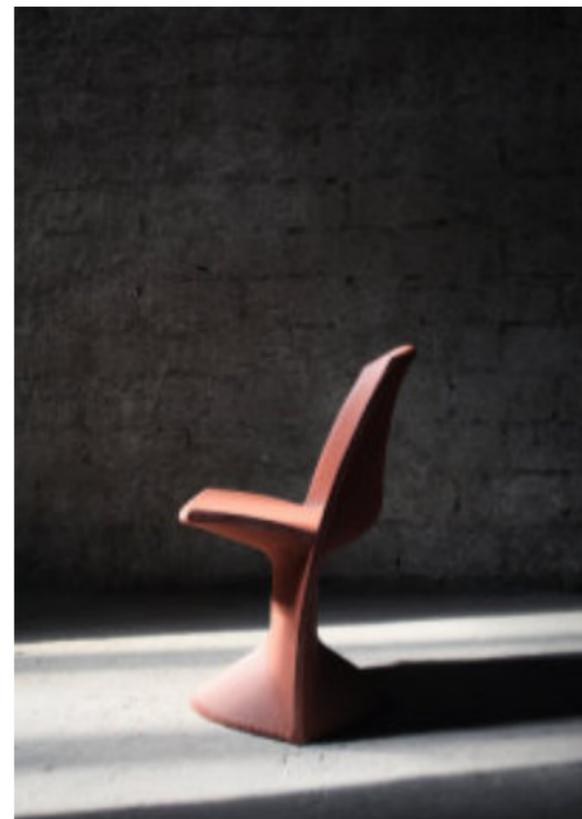

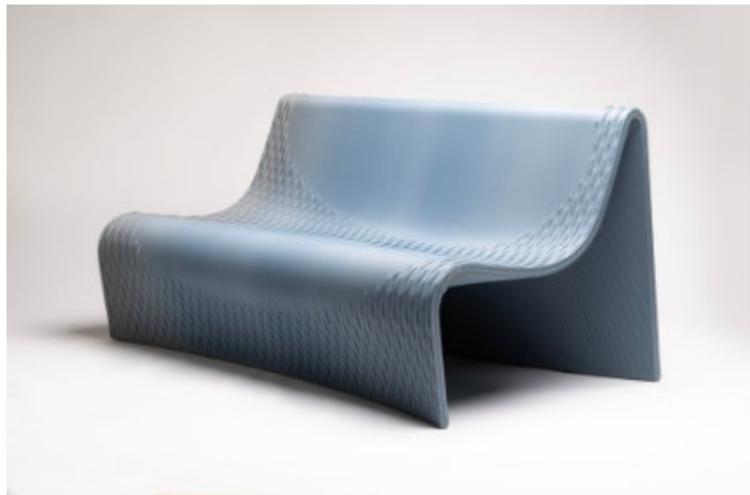

Apollonion Asterias Resort & Spa, Kefalonia island

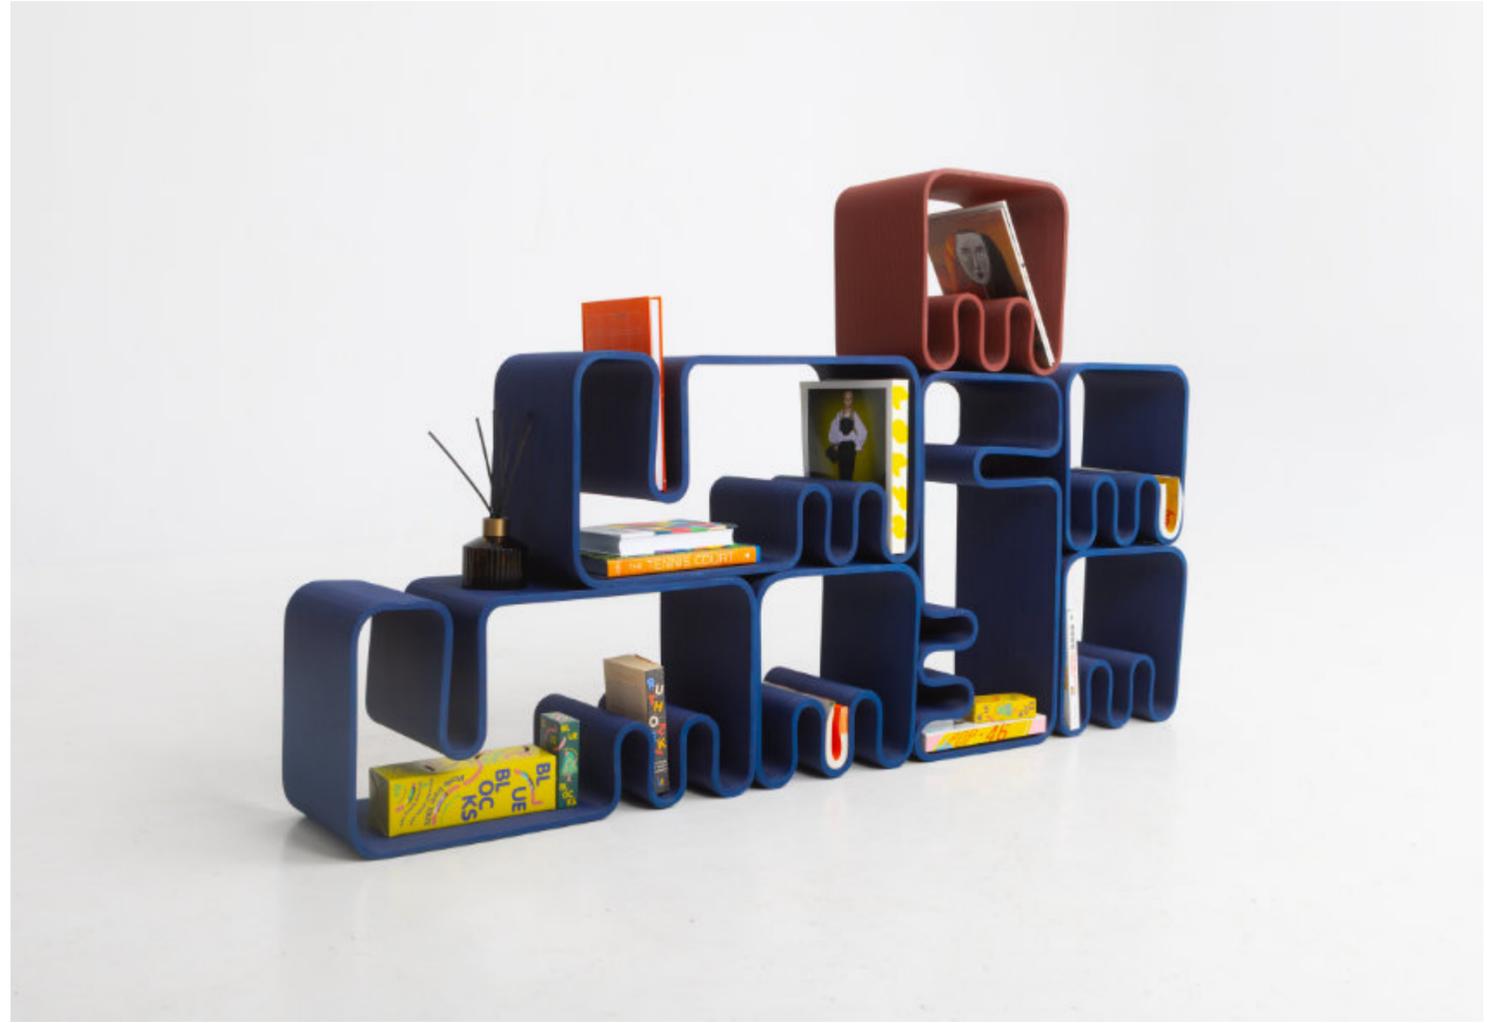

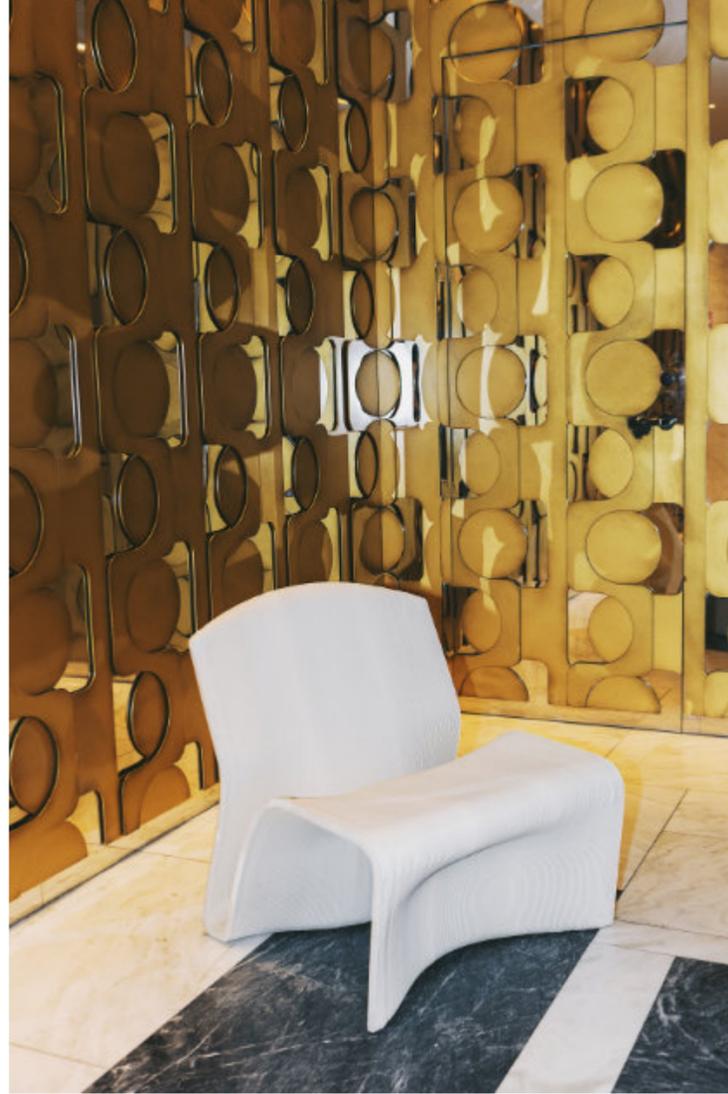

Lounge & Living

Dining & Social

Astor Hotel, Athens

Adidas flagship store, Athens
